

Line-up Procedures for Regular Race Meets

Registration

- All drivers will report to a designated area and register by 6:30.
- Failure to register by 6:30 will result in that driver starting on the rear.

Heat Races

- Heat race line-ups will be determined by using point standings or by qualifying times, if time trials are conducted.
- The formula for determining the number of heat races will be as follows:
 - less than 8 cars – 1 heat
 - 8-20 cars – 2 heats
 - 21-30 cars – 3 heats
 - 31-40 cars – 4 heats
 - 41+ cars – 5 heats
- The first heat will be made up of the top point drivers or the fastest qualifiers. The second and all subsequent heats will be for the next group in points or qualifying times.
- All heat race lineups will be complete inverts.

Feature

- Feature race line-ups will be determined by points or qualifying times if time trials are conducted.
- If there are fewer than 26 cars, all cars will run the feature event.
- When the car count reaches 26, the 18 top point drivers or qualifiers will be locked into the feature and the remainder will run the B-Main.
- The top 2 finishers in the B-Main will be added to the feature to make a 20 car starting field.
- All feature races will have 6 8 or 10 car invert determined by dice roll which is based on either points or qualify time.
